CLOUDWINKS · HOME, FAMILY & EVERYDAY LIFE

ComfyCottage

Business brief

ComfyCottage keeps a family's home running: the property, its upkeep, what is in it and what it costs.

1. What it does

ComfyCottage is the home and property management application for families. It tracks the property, schedules maintenance, keeps a home inventory, holds a family calendar and tracks household expenses.

2. Main features

- Property tracking
- Maintenance scheduling
- Home inventory
- Family calendar
- Expense tracking
- Household management tools for families

3. How it works with other applications

ComfyCottage records belong to the person who owns them, and use the shared Crux record for each family member. Every item it manages also uses the CloudWinks base functions: media through MediaMogul, role players, dates and times, ratings, budgets, transactions and a status flow. Each base function opens the controls in the app that owns them, so nothing is duplicated.
