GoGrownup

Business brief

GoGrownup helps adults manage the practical side of life: goals, money, health and career, all in one organised place.

1. What it does

GoGrownup is the adult life management and planning application. It supports goal setting, financial planning, health tracking and career management, with life organisation tools for adults managing personal and professional responsibilities.

2. Main features

- Goal setting
- Financial planning
- Health tracking
- Career management
- Life organization tools for adults

3. How it works with other applications

GoGrownup records belong to the person who owns them and use the shared Crux record for identity. Every item it manages also uses the CloudWinks base functions: media through MediaMogul, role players, dates and times, ratings, budgets, transactions and a status flow. Each base function opens the controls in the app that owns them, so nothing is duplicated.
