CLOUDWINKS · SPECIALIST SERVICES & COMMUNITIES

MrSam

Business brief

MrSam gives government agencies and public sector organisations the tools to serve citizens and stay compliant.

1. What it does

MrSam is the government and public sector application. It supports citizen services, manages cases, tracks compliance, produces regulatory reports and provides administrative tools for agencies and public sector organisations.

2. Main features

- Citizen services
- Case management
- Compliance tracking
- Regulatory reporting
- Administrative tools for government agencies and public sector organizations

3. How it works with other applications

MrSam can be used by individuals and organisations, each with their own private records. Every item it manages also uses the CloudWinks base functions: media through MediaMogul, role players, dates and times, ratings, budgets, transactions and a status flow. Each base function opens the controls in the app that owns them, so nothing is duplicated.
